

SUFFERING FROM GAS AND ODOUR?

Well you soon could be if you don't register your objection to the Grundon Incinerator before 31 January 2012. Do it now and help us to stop Grundon building their 250,000 tonne waste incinerator near Newbury.

- Grundon were fined by the environment agency in Sept 2010 for operating a landfill site that caused gas emissions and odours
- Grundon has breached their existing planning conditions of the quarry at Old Kiln Farm by not returning it to woodland and agriculture by April 2010
- Grundon are also actively seeking planning permission on an Area of Outstanding Natural Beauty

If you want to help save our countryside for this and future generations, go to www.wbagi.org and register your objection.

West Berkshire Against
Grundon Incinerator

Register your objection to the Grundon Incinerator before 31 January 2012
